

FIREPRO®

Designed and developed
in Australia by Firefighters
... for Firefighters

Accredited to the EN659 standard for fire fighting gloves

The original Firepro® glove was the culmination of two years design and development undertaken by Allglove Industries and the Fire Service.

The brief was to produce a fire-fighting glove that would fulfil the everyday needs of operational firefighters here in Australia. A multi layered glove that possessed the required heat and cut resistance whilst retaining the good dexterity and feel required for a practical, working firefighting glove.

After Accreditation to the EN659 Standard the Firepro® was adopted by the Western Australian Fire Service in the year 2000 as their operational structural firefighting glove and has been in front line service ever since.

Specialist Hi-wear leather outer developed specifically for firefighting operations to give the right balance of protection and dexterity.

- Exceeds all requirements of EN659.
- Fire resistant double ribbed cuff, complete with wrist protector.
- Sewn with 100% 3 ply Kevlar thread throughout.
- All high wear seams are double reinforced.
- Aquapel leather protector for easy care and water resistance.
- Seven sizes XS, S, M, L, XL, XXL, XXXL.
- Custom made facility available for one-off sizes.

Kevlar®
Only by DuPont

What is Kanacaron?

Kanacaron is a 35% Kevlar, 65% Nomex Jersey, developed specifically as a lining material for Firefighting applications. It affords excellent heat resistance, cut protection and comfort.
